Subject: Keystone Power Outages

Good morning Angie!

I spoke with Kevin on the phone earlier today and I let him know that I would be sending a statement from Alliant Energy concerning the power outages affecting the community. The statement is below:

At Alliant Energy, we pride ourselves on providing safe, reliable energy to the communities we are honored to serve. We understand it is frustrating when the power is out and take great pride in identifying and resolving any outages as quickly and safely as possible.

We have reviewed outages that have impacted the Keystone community. Most recently, on January 26, 2026, the sustained cold weather and wind caused an outage, while on January 15, high winds were the cause of the outage. Alliant Energy crews responded and repaired the lines in both instances.

Based on system capacities and capabilities, during this time of year we have made a temporary adjustment that will enable us to further inspect the line feeding the community of Keystone. We are also increasing the frequency of our normal patrols in an effort to identify any potential issues proactively before they impact customers.

Additionally, following the December 25 and 27 outages, we (Alliant Energy) worked with our transmission provider, ITC Midwest, to evaluate the causes. ITC informed us that their patrol of the poles identified a failed piece of equipment that they repaired.

A review of additional outages identified several that were caused by animals, weather or equipment issues. Following outages caused by animals, measures were implemented to further deter animal entry.

We know that you count on us to provide safe, reliable energy to power your lives, and we will continue to work hard every day to meet that responsibility. If customers have questions or concerns, we encourage them to reach out to us at 1-800-ALLIANT

Let me know if you have any questions.

Thank you,

Tanner Clayton | Manager of Customer Operations
